

Club Z! Tutoring of Pittsburgh

Quick Tip Series

Is your preschooler ready for Kindergarten?

Here are a few quick tips to help. For more information, please visit our blog at clubztutoring.com/pittsburgh/blog/ for more tips about this subject and others.

■ Fire up your Preschooler!

How do you harness the energy of preschoolers in preparing them for kindergarten? That's simple - you EMBRACE it! Fire them up with activities that help them develop early skills in reading, writing and math to build a foundation of excitement and wonder and hopefully, a love of learning. Reinforcing learning through play activities is energizing.

■ Can your Child...

- recognize and name colors, numbers from 1-10, and shapes?
- count to 5, copy simple shapes, know their body parts, group same items?
- do things for themselves, show self-control, comply with rules and routines, ask for help, and show initiative for new things?
- write or draw, write their name, pretend, make up songs and stories?
- identify some of the alphabet and recognize some common sight words like "stop"?
- cut with scissors, put 10 puzzle pieces together, run, skip, kick a ball, hold and use crayons appropriately and trace basic shapes?
